FOR IMMEDIATE RELEASE: March 10, 2008 (Gaithersburg, MD)

Immunomic Therapeutics Files Materials for Pre-IND Meeting on Argotom-VAX, a Therapeutic Vaccine for HIV

Gaithersburg, MD, March 10, 2008 /-- Immunomic Therapeutics, Inc. (ITI, www.immunomix.com) announced today that it has completed its data packet filing in support of the Company's first pre-IND meeting. The packet was filed as part of the process leading up to a Phase I clinical study of ITI's therapeutic HIV vaccine, Argotom-VAX, a project being conducted in conjunction with Genoa Biotecnologia, S.A. (Sao Paulo, Brazil). "This is an important step in the clinical development of ITI's LAMP – based DNA vaccines," said Dr. Bill Hearl, President and CEO of ITI. "We are optimistic we can be ready to file the full IND by the end of the year and start the clinical trial early in 2009. We believe the approach of therapeutic vaccines can be of great benefit to HIV infected individuals, so we are looking forward to starting the trial as soon as possible."

About Immunomic Therapeutics

Immunomic Therapeutics, Inc. ("ITI") is a privately held biotechnology company headquartered in Gaithersburg, Maryland that is commercializing DNA vaccines that are important to human health. ITI's vaccines utilize its proprietary LAMP Technology and have been shown to enhance the immune response in human clinical studies. LAMP vaccines are currently in or preparing for clinical studies for cancer (AML and prostate cancer), therapeutic HIV, allergy and influenza. More information about ITI and LAMP technology can be obtained from www.immunomix.com or www.immunomictherapeutics.com.

This press release may contain forward looking statements regarding, among other matters, the Company's future prospects. Forward looking statements address matters that are subject to a number of risks and uncertainties that can cause actual results to differ materially. Investors are cautioned that such forward-looking statements in this press release regarding potential applications of ITI's technologies, constitute forward-looking statements that involve risks and uncertainties, including, without limitation, risks inherent in the development and commercialization of potential products, uncertainty of clinical trial results or regulatory approvals or clearances, need for future capital, dependence upon collaborators and maintenance of our intellectual property rights. Future results of the Company will depend on a variety of factors, including the timing of significant orders, the ability of the Company to timely manufacture and deliver ordered products, the ability of the Company to bring new systems to market, the timing of new product releases by the Company's competitors and other competitive factors.
